## **Data quality**

The information supplied in the tables is based on the data held in our Dynamics appeal management system. The data is considered to be of consistent quality.

## **Rounding**

All figures are rounded to the nearest ten.

## **Uses made of the data**

The data are used in reporting to stakeholders, including in the VTS Annual Report and Accounts, and in response to Parliamentary Questions and requests made under the Freedom of Information Act.

## **Background notes**

1. The Valuation Tribunal Service (VTS) provides administrative support in England to the Valuation Tribunal for England (VTE), which hears appeals against non-domestic rating and council tax valuations. The VTE also hears a small number of other types of appeals.
2. All the data have been taken from our appeals databases to reflect the position on 31 December 2025. However, there can be some small differences between the brought forward figures for this quarter/year and the carried forward figures from the previous quarter/year, due to clearances and re-instatements of appeals that occur between the end of a quarter and the date the report is run.
3. For the 2017 and 2023 non-domestic rating list, appeals may be made by an appellant only after 'check' and 'challenge' stages have been completed with the VOA and a decision issued on the proposal (or 'challenge') with which the applicant disagrees.
4. While the non-domestic rating data cover appeals against both the central and local rating lists for England, they may include a statistically insignificant number of central list appeals for Wales, where the head offices of the appellants are located in England.
5. For council tax valuation, appeals arise when the VOA listing officer receives a formal challenge to a valuation list entry and issues a notice of decision to the proposer (and any other interested person) with which the person disagrees. The proposer (or interested person) has three months in which to make an appeal to the VTE against the VOA listing officer's decision.

Prior to 1 April 2008 (when 'appeals direct' came into statute), an appeal arose when the Valuation Office Agency (VOA) received a formal challenge to a valuation list entry and the dispute was not resolved within three months, after which it was automatically transferred to the VTS and become an appeal.

6. For council tax liability and reduction appeals, application must first be made to the billing authority. An appeal may be made if the applicant remains unhappy with the billing authority's decision or if the authority does not respond.

7. Council tax and the council tax valuation list came into effect on 1 April 1993.

8. Council tax reduction (or support) replaced council tax benefit from 1 April 2013, at which time jurisdiction for these appeals came to the Valuation Tribunal.

9. The VOA also publishes a Statistical Release, quarterly. The data the VOA publishes for non-domestic rating refer to formal challenges, not appeals. Not all formal challenges result in appeals as some may be settled before they became appeals, so the figures in the VOA release will be different from those published in this Statistical Release. Whilst both releases show a snap-shot of the data from their databases, they may not refer to the same appeals. In addition, there is also a delay between staff at the VTS clearing an appeal on its appeals database and the VOA clearing an appeal on its database. All of these factors mean that comparisons between the figures presented in both releases should not be made.

## Glossary of terms

**Appeal:** made to the VTE for resolution, when agreement has not been reached on a formal challenge made to the VOA.

**Billing authority:** a local authority empowered to set and collect non-domestic rates.

**Cleared appeal:** an appeal that is no longer live, either because the dispute has been settled by agreement between the parties, or because there has been a determination by the VTE.

**Formal challenge (proposal):** ratepayers and council taxpayers can make a 'proposal' to alter the rating list or valuation list if they think an entry in there is wrong. A proposal asks the valuation officer (known as the listing officer for council tax) to change the entry in the list.

**Non-domestic rates:** the means by which local businesses contribute to the cost of local authorities' services, although their level is set by central government. They are also known as "business rates".

**Rating list:** the Valuation Office Agency's list of all the businesses and non-domestic properties in England and Wales. There is a separate local list for each billing authority. There is also a central rating list for properties of companies named in the Central Rating List Regulations 2005, e.g. those with major transport, utility and telecommunications networks or cross-country pipelines.

**Settled appeals:** appeals that are no longer live because the dispute has been settled by agreement between the parties.

**Valuation list:** the Valuation Office Agency's list of all of the domestic properties in England and Wales. There is a separate local list for each billing authority.
